BECAUSE WE CARE

Date of Treatment: Friday - July 15, 2011Time of Treatment: Arrival: 9:00 - 10:00 a.m. (Approximate Time)

Terminix is an honest, reliable, bonded local firm. This treatment is performed as regular maintenance and is scheduled with the management.

Every apartment must be treated inside, otherwise pests will gather and spread from untreated areas.

Terminix will treat baseboards, crack and crevices, under sinks, service entrances and behind appliances. Treatment will not be applied near open food containers. All treatment solutions are approved by the Department of Agriculture, the State of Hawaii and the Environmental Protection Agency.

JUST IN CASE

1. Do not lock the dead bolt and be sure management has access to your apartment.
2. Remove all pets. Fish tanks may be left in the unit, provided they are covered and air pump turned off.
3. If you have noticed pests in your cupboards, please leave a note for the technicians so they may treat those areas in particular.
4. Leave any other instructions for the technicians that you feel your unit needs.
5. Uncovered food or dishes must be removed from counters and tables.
6. Rooms of persons having *allergies, asthma, pregnancy, families with small infants, or other health conditions will be serviced with baits only*, so please contact your manager.
7. OCCUPANTS SHOULD VACATE THE APARTMENT WHILE SERVICE IS BEING PERFORMED FOR APPROXIMATELY ONE (1) HOUR.
